The Apache Directory Project

The Apache Directory Project provides directory solutions entirely written in Java. These include a directory server, which has been certified as LDAP v3 compliant by the Open Group (Apache Directory Server), and Eclipse-based directory tools (Apache Directory Studio).

Project Vision

We strive to increase LDAP awareness, comfort and adoption to bring forth what we call the Modern LDAP Renaissance. Learn more about our vision [here](#).

Directory Sub-Projects

Apache Directory Server

ApacheDS is an embeddable directory server entirely written in Java, which has been certified LDAPv3 compatible by the

Apache Directory TripleSec

Triplesec is what you get when you combine 2-factor strong authentication with identity management. Triplesec is a

Apache Directory Studio

The Studio is an LDAP client platform. It is composed of an Eclipse RCP Application and a set
