Auto blocking active ★	True ▾
Checksum Policy ★	Warn ▾
☐ **Authentication (optional)**	

Flag to enable Auto Blocking for this proxy repository. If enabled, Nexus will auto-block outbound connections on this repository if remote peer is detected as unreachable/unresponsive. Auto-blocked repositories will still try to detect remote peer availability, and will auto-unblock the proxy if remote peer detected as reachable/healthy. Auto-blocked repositories behaves exactly the same as user blocked proxy repositories, except they will auto-unblock themselves too.
